

QUALITY AND SAFETY ANALYSIS COMPLIANCE STATEMENT

We hereby acknowledge and confirm that every production lot of our sesame, tahini, and sesame oil products is subjected to the quality and safety analyses specified below. These assessments are conducted in our in-house laboratory as well as at accredited third-party laboratories, in full accordance with international food safety standards.

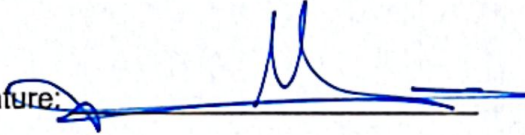

The following parameters have been tested and comply with applicable regulatory requirements:

- Aflatoxin content
- Pesticide residues
- Heavy metals (Lead, Cadmium, Mercury, Arsenic)
- Salmonella
- Escherichia coli (E. coli)
- Bacillus cereus
- Coagulase-positive Staphylococci
- Moisture content determination
- Oil content analysis
- Ash content determination
- Color and sensory evaluation
- Free Fatty Acid (FFA) level
- Peroxide Value (PV)

We hereby represent and warrant that shipment authorization shall only be granted upon laboratory analyses confirming the products' full compliance with international food safety, hygiene, and quality standards. We further undertake that no shipment approval shall be issued from our facility for any products that fail to meet these requirements.
